

KNOWLEDGE ORGANISER: Transport

What is transport?

What is transport used for?

What different types of transport are there?

Building/Construction

We will be:

Naming different types of transport

Learning what the different types of transport can be used for

Creating artwork inspired by different transport

Junk modelling transport

Exploring real transport

Listen to the song about different transport

Key information:

Transport is the word for vehicles that move people from one place to another.

Some example of different types of transport are cars, trains, bikes and planes.

Different transport can be used for different things. Cars are usually used for journeys to school or the supermarket. Trains carry lots of people to the same place at one time. Aeroplanes are used for travelling to different countries.

Key vocabulary:

Transport

Car

Train

Aeroplane

Helicopter

Bike

Boat

Bus

Sing along to the Wheels on the Bus

LEARNING MAP

Rising 3's

Sorting transport based on what it's used for
Tinker stations to find out how things work
Talk about the environmental impact of transport

Future Learning

Reception – Our Planet

Describe their immediate environment

Linked Texts

Cars and Trucks and Things that Go – Richard Scarry
Emma Jane's Aeroplane – Katie Haworth and Daniel Rieley
Choo Choo Clickety Clack – Margaret Mayo

Learning at home

What vehicles have you been in? Can you take a photo: in a car; on a train; on a boat; on a plane?

Use junk modelling to make your favourite vehicle

Do you have a book about a vehicle at home? Can you share a story with someone at home?
