

Intent:

**Communication,  
language &  
vocabulary**

**Books and reading**

**Experienced-based  
learning**

**Knowledge and  
retaining  
knowledge**

Online technology provides new opportunities for young people's learning and growth, but it can also expose them to new types of risks. NSPCC 2020

- E safety at Bank Leaze encourages our students to engage with the benefits of online activity in a safe manner. We encourage children to follow the schools online safety procedures both within the school and home environment.
- Our E-safety curriculum will encourage children to take charge of their online presence. It will provide children with the skills they need to engage positively online.
- We will ensure that all children understand how to stay safe online and are able to behave in a responsible manner when accessing the internet.
- The teaching of E-safety will involve opportunities for discussion within the classroom environment, through these discussions we will encourage children to speak openly. Children will also be supported to question the online community and will be provided with opportunities to reflect and adapt upon their own online presence.
- Learning will involve teachers modelling positive online behaviour. The curriculum will also ensure that children are provided with a wealth of online experiences that will encourage a safe and positive online experience for all.
